DOING YOUR PART

Kudzu

To prevent the spread of exotic pest plants into natural areas, you should...

- Avoid clearing native vegetation, planting exotic pest plants and dumping yard wastes in natural areas.
- Purchase native, not exotic plants for landscaping or land restoration projects.
- Control exotic pest plants on your property by either removing them or by preventing them from entering.
- Ask local nurseries and garden shops not to sell exotic pest plants.

- Offer to assist in exotic plant removal projects.
- Work with your local government to encourage the use of native plants in their urban and suburban landscape.

Japanese stiltgrass

Periwinkle

Common Reed

Golden Bamboo

Princess Tree

Chinese Wisteria

Johnson grass

Mimosa Tree

Princess Tree
